CARIBBEAN WORKFORCE • HUMAN APPROVAL

OECS HR & Payroll

Visual User Guide

The complete employee-to-approved-payroll journey

Install → Clock → Resolve → Prepare → Approve → Report

Visual steps for staff, payroll managers and company administrators.
Fictional illustrations; no private employee records.

Training Hub

User Guide v9 • Updated 01 November 2026

AI assists. The manager approves. Wage payment stays separate.

Workforce on the Move

Clock in at any job site, on any phone or company tablet.
Every punch syncs to one payroll.

CONSTRUCTION LANDSCAPING RADIO & TV HOSPITALITY

Your people don’t sit at one desk. Crews build on Site 1 today and Site 2 tomorrow. Gardeners visit five properties before lunch. Camera crews chase the story across the island or overseas. OECS HR & Payroll follows them: workers punch wherever a clock is active and the platform collects every minute into a single timesheet that is ready for the AI Paymaster and your approval.

Any site
roaming workers

Same day
site-to-site moves

Phone or tablet
one synced timesheet

One worker. Three sites. One payday.

A typical day for a construction or landscaping crew member, set to “Any active job site”.

07:30 1

Clock in · Site 1

Phone checks location against the Site 1 boundary.

11:45 2

Clock out · Site 1

Leaves for the next job.

12:20 3

Clock in · Site 2

Uses the Site 2 tablet or their own phone.

15:00 4

Clock out · Site 2

Moves on again the same day.

15:30 5

Clock in · Site 3

Any active site is accepted.

17:00 6

End of day

All punches land in one timesheet.

Travel between sites — your company decides

OFF (default): the gaps between clocking out at one site and in at the next are not paid. ON: Attendance → Clock settings → “Pay travel time between job sites” pays first clock-in to last clock-out, with nothing deducted for travel.

Built for companies that never stand still

Landscapers & grounds crews

Visit hotels, villas and estates in one day. Each property can be a job site; crews punch on arrival and departure so clients and payroll see real time on each property.

Radio & TV stations

Reporters, camera operators and engineers work in the studio, at outside broadcasts and on assignments. Studio staff use the shared tablet; field crews use their own phones. Same timesheet.

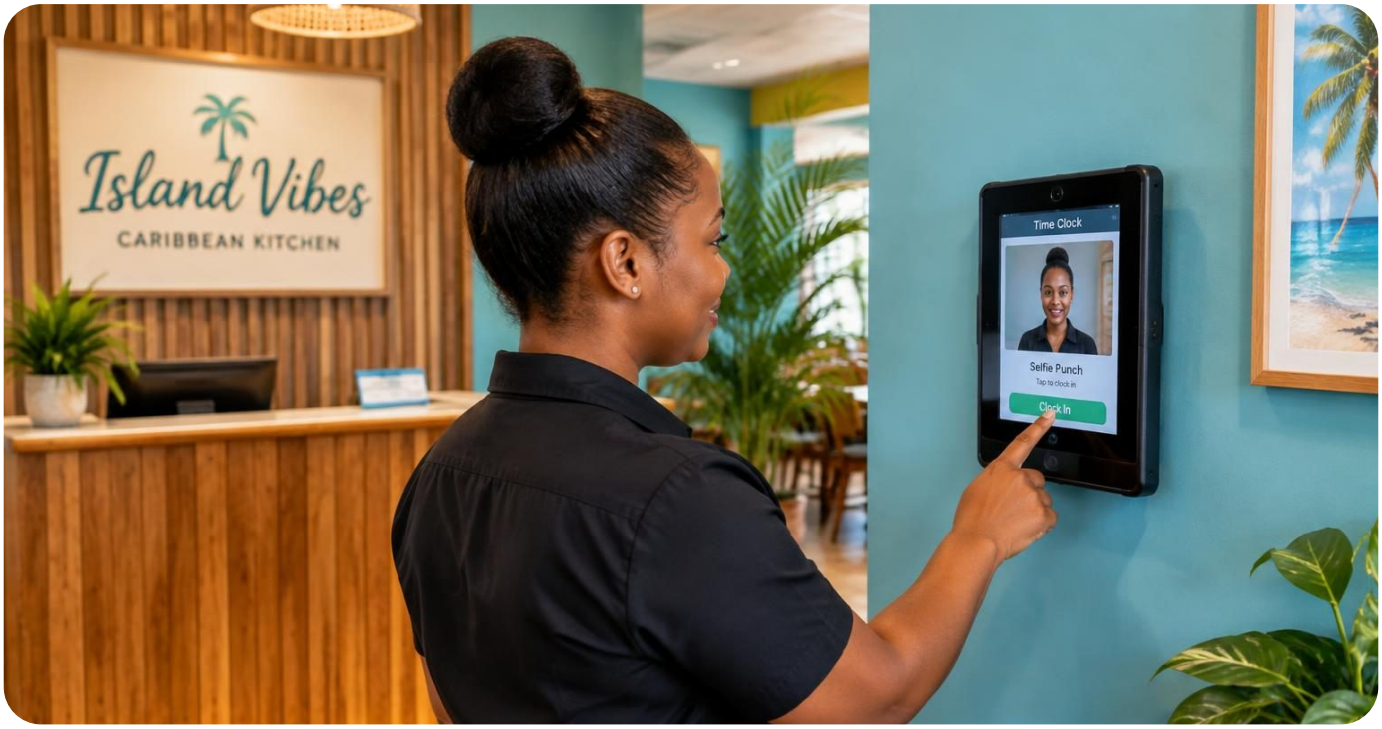

Construction & field services

Move crews between projects as work demands. Roaming workers may clock in at any active site, and each punch records where the work happened.

Working in more than one island or abroad? Each company keeps its own sites, clocks and payroll rules, and administrators with multi-company access switch between them with one login.

Personal phone or company tablet

Staff choose what is convenient; the platform keeps one record.

MY PHONE

- Open the personal link, QR code or WhatsApp invite
- Add the app to the home screen
- Clock in, lunch out/in and end shift
- Location checked at every punch
- Offline punches queue and sync later for manager review
- My dashboard: hours, days, late arrivals, estimated pay

COMPANY TABLET

- Reception, kitchen, studio or site office
- Activated by an admin with a 15-minute code
- Many staff share one device
- Selfie can be required per company
- Hands-free voice option uses the name on file, with a selfie
- Voice and offline punches always go to a manager

Phones and tablets feed the same attendance record, so the AI Paymaster prepares payroll from every site and an administrator still approves before anything is saved or paid.

Turn it on in four steps

1

Add your job sites

Attendance: create each site with its location and boundary.

2

Let workers roam

Employee folder → Login & clock → Required work site → “Any active job site (moves between sites)”. Save.

3

Decide on travel time

Attendance → Clock settings → “Pay travel time between job sites”: on to pay it, off to leave gaps unpaid.

4

Hand out the clocks

Send personal links by WhatsApp, email or QR code, and activate a tablet at each site or department.

Good to know

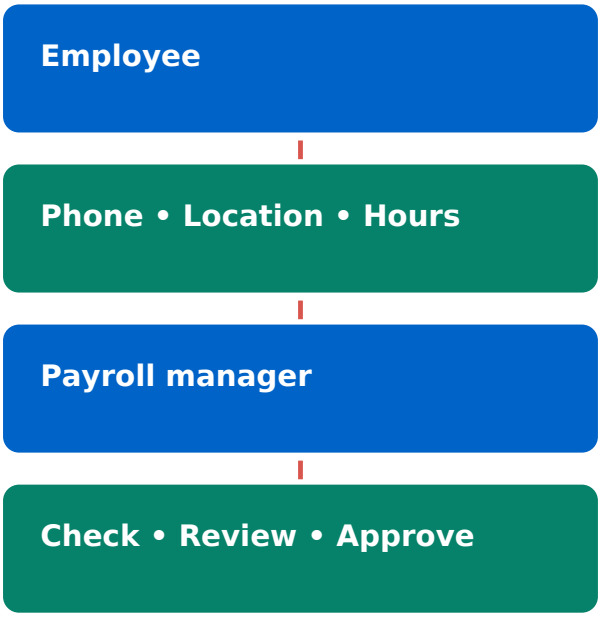

- Workers with a fixed site keep the boundary rules of that site.
- Punches outside any active site are refused, which helps stop buddy punching.
- Timesheets already recorded are not changed when you switch travel pay on or off.
- Approval by a person remains the only way payroll is saved.

EVERYONE

Your journey: phone to payroll

Employee + administrator

Install → Punch → Resolve → Review → Approve

ILLUSTRATED WORKFLOW

1 Employee

Install the app, record shifts and raise questions before pay day.

2 AI assistance

Look for missing time and unusual changes. Use the suggestions to prepare your review.

3 Human approval

The manager checks the final figures and saves payroll. Arrange payment separately.

CHECK BEFORE YOU CONTINUE

You always know who does the next step.

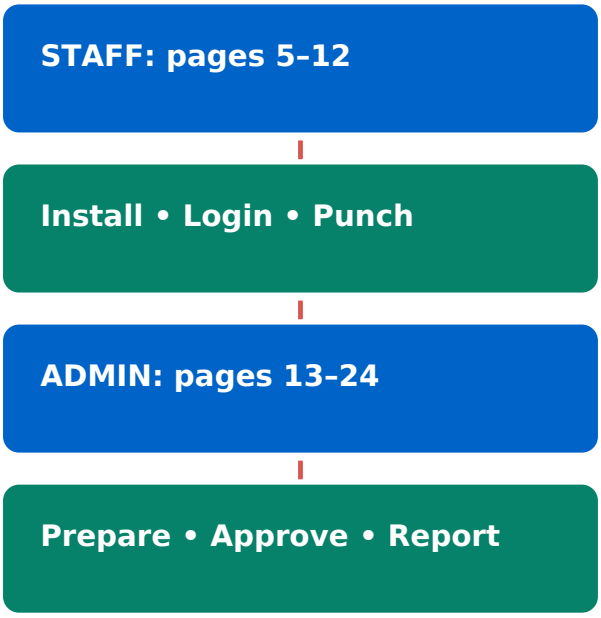

Illustrated screens throughout this guide are simplified examples, not screenshots or real employee records.

EVERYONE

Find your place in the guide

Two simple reading paths

Staff → Manager → First payroll

ILLUSTRATED WORKFLOW

1 Staff path

Begin with the invitation on page 4. Follow your own hours, requests and payslips.

2 Manager path

Start with company setup, then clear attendance and run the correct pay period.

3 New company

Use the separate Setup Guide for the full spreadsheet-to-first-payroll checklist.

CHECK BEFORE YOU CONTINUE

Page numbers include the cover. Save this PDF on your phone.

Only pages allowed by your role and the company's selected features appear in your workspace.

ADMINISTRATOR

Send the employee an app link

Attendance → Share staff app

Choose staff → **Send link** → **Install**

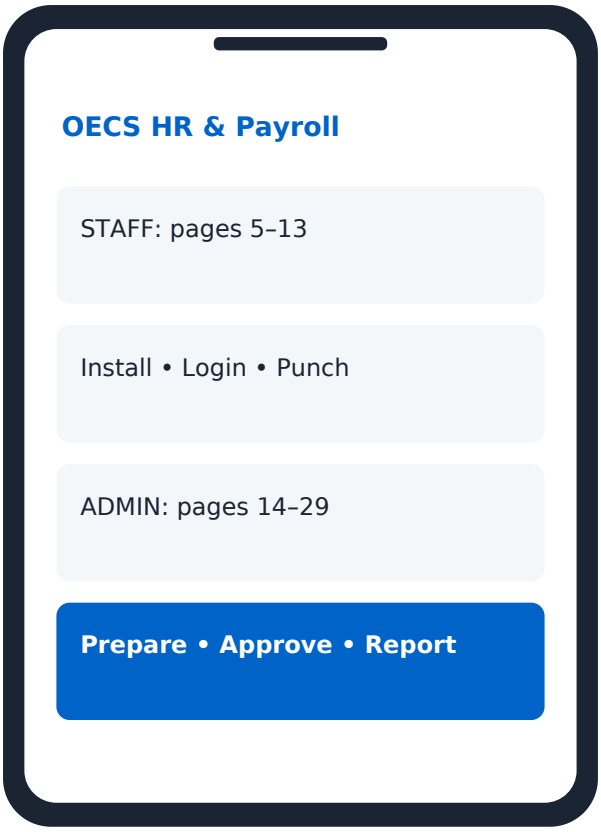

ILLUSTRATION • NOT A LIVE SCREEN

1 Open sharing

In Attendance, select Share staff app. Use your own company's generated link.

2 Choose a channel

Tap WhatsApp or Email to compose a message; choose the recipient and send it. Or share the QR code.

3 Provide access separately

Configure the employee's account and clock first. The install link is not a login credential.

CHECK BEFORE YOU CONTINUE

Ask the employee to confirm that the correct company clock opens.

The company link remains the same when the app is updated. Never include private PINs in group messages.

EMPLOYEE

Install on an Android phone

Open the company link in Chrome

Link → **Chrome menu** → **Install** → **Open**

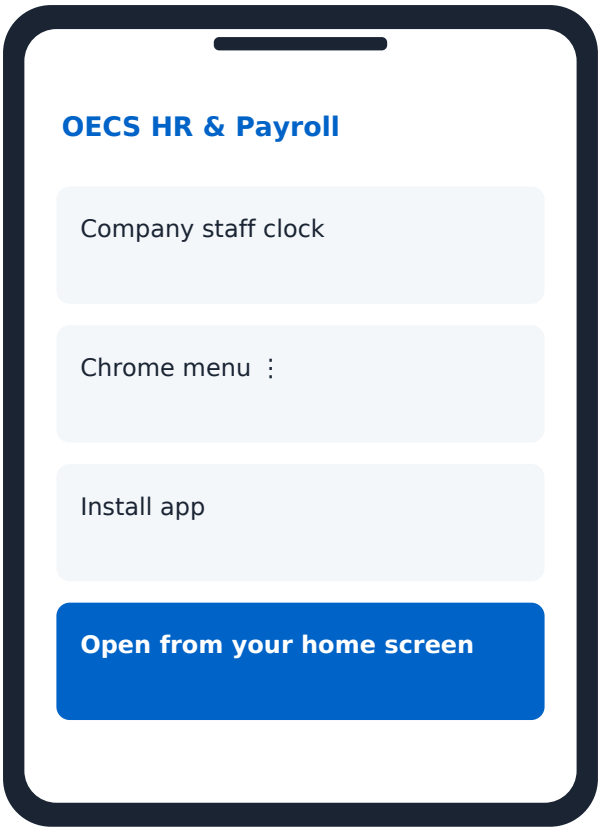

ILLUSTRATION • NOT A LIVE SCREEN

1 Open the link

Tap the link sent by your administrator. Check that it belongs to your employer.

2 Install

Open Chrome's menu and choose Install app or Add to Home screen. Confirm the prompt.

3 Launch

Tap the new app icon. Keep mobile data or Wi-Fi available for clock actions.

CHECK BEFORE YOU CONTINUE

You can reopen the clock from the home screen.

Menu wording varies by phone. If no install option appears, use the link in the browser and ask your administrator for help.

EMPLOYEE

Install on an iPhone

Open the company link in Safari

Safari → Share → Add → Open

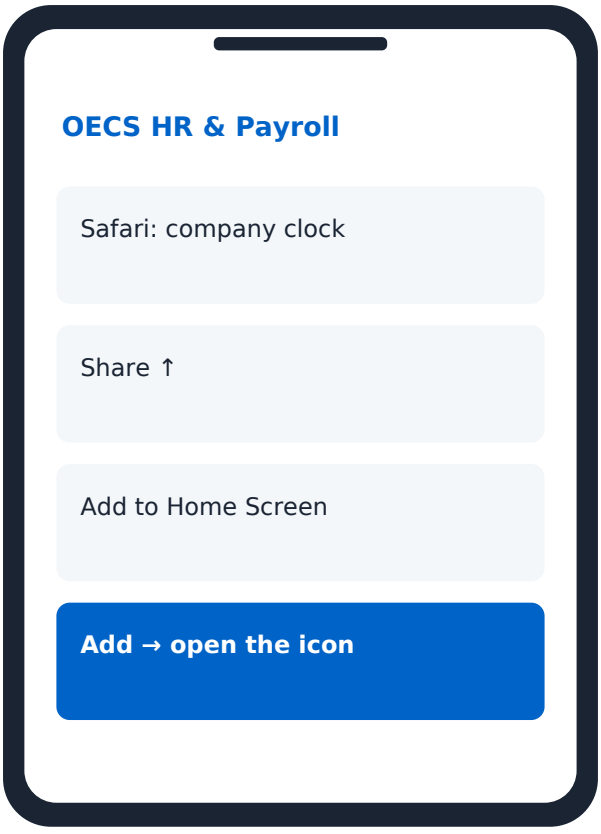

ILLUSTRATION • NOT A LIVE SCREEN

1 Open in Safari

Copy the company link into Safari if your messaging app opens another browser.

2 Add the icon

Tap Share, then Add to Home Screen. Tap Add to confirm.

3 Open and allow location

Launch the icon. Allow location when prompted for a clock action.

CHECK BEFORE YOU CONTINUE

The company clock opens without finding the message again.

An internet connection and usable device location are needed for live punches. Installing does not automatically sign you in.

EMPLOYEE

Choose the right login

Login account ≠ clock-only PIN

Account → **My account** → **Own pay & requests**

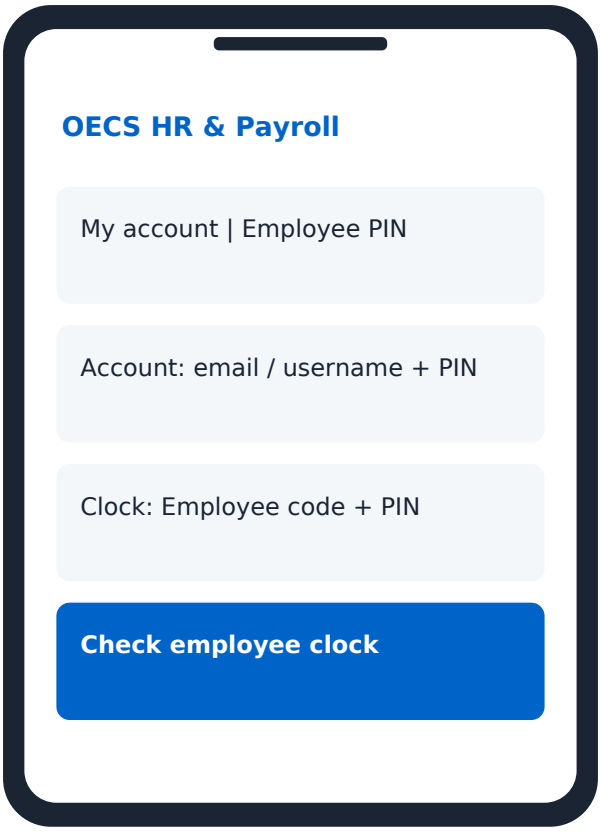

ILLUSTRATION • NOT A LIVE SCREEN

1 Full staff workspace

Use your administrator-provided email/password or account PIN login. This lets you view your own pay and submit requests.

2 Clock-only access

On a company clock link, enter Employee code and the staff clock PIN, then Check employee clock.

3 Need pay or disputes?

Ask the administrator for a sign-in account. A clock-only PIN does not unlock the pay/request panel.

CHECK BEFORE YOU CONTINUE

Your identity and permitted clock methods match your employee folder.

Account PIN and staff clock PIN are separate settings. Keep both private; never use the public demo PIN for real work.

EMPLOYEE

Start your shift: Clock In

Mobile Time Clock

Identify → **Locate** → **Clock In** → **Confirm**

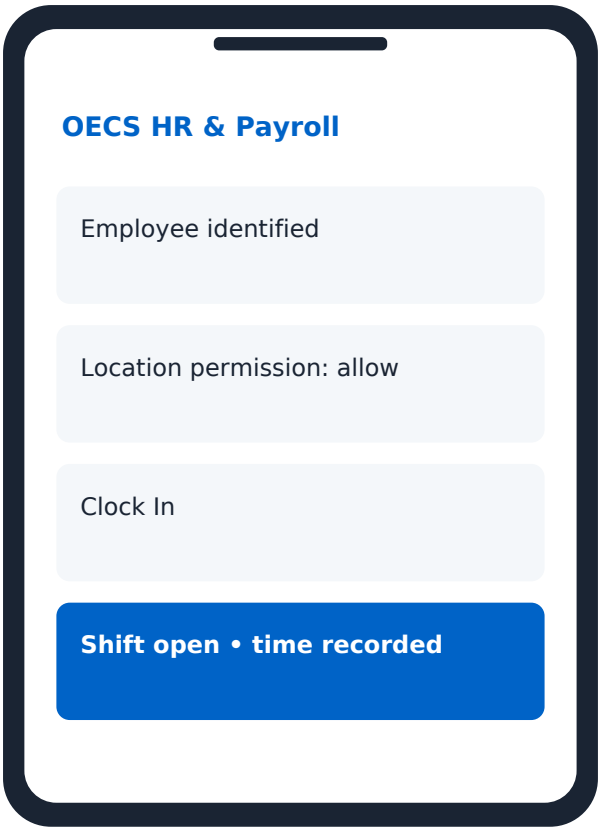

ILLUSTRATION • NOT A LIVE SCREEN

1 Check yourself

Use My account or identify yourself with your Employee code and staff clock PIN.

2 Allow location

Enable phone location and permit the app to use it. Be at your assigned site if required.

3 Tap and verify

Select Clock In once. Wait for the success message and confirm that the shift is open.

CHECK BEFORE YOU CONTINUE

The shift has a recorded clock-in, not just a tapped button.

Each punch records device location and official server time. Location supports fraud checks; it is not a guarantee against every form of buddy punching.

EMPLOYEE

Finish your shift: Clock Out

Mobile Time Clock

Open shift → **Clock Out** → **Confirm** → **Check hours**

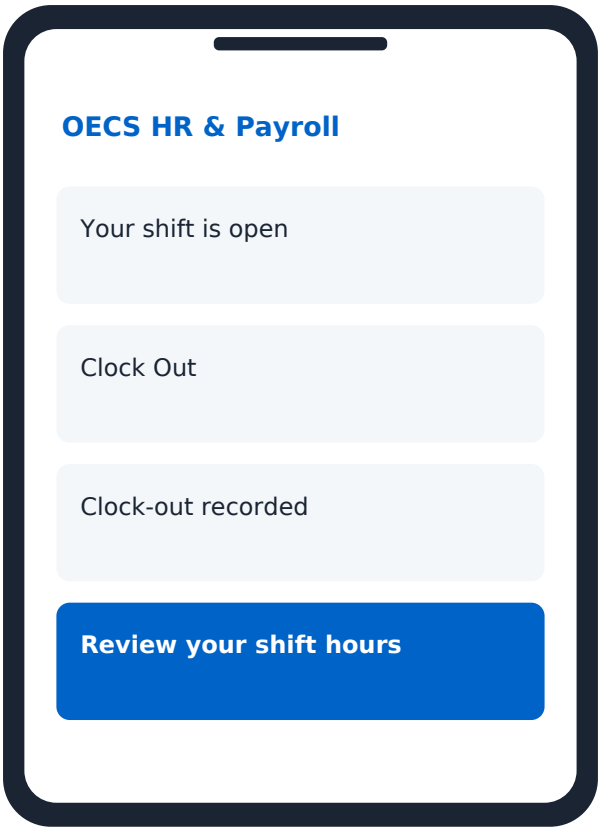

ILLUSTRATION • NOT A LIVE SCREEN

1 Use your own identity

Reopen the company clock at the end of your shift. Check that it shows your open shift.

2 Record the end

Tap Clock Out and allow location again if asked. Stay on screen until it succeeds.

3 Check the result

Read the recorded end time and hours. Raise a correction if a time is wrong.

CHECK BEFORE YOU CONTINUE

Both ends of the shift are recorded.

If a punch fails, do not invent a replacement. Note the actual time and ask for a correction. No offline punch should be assumed saved.

EMPLOYEE

Never miss a punch: reminders

Time clock / Clock reminders & alarm

Shift soon → **Alarm** → **Punch** → **Done**

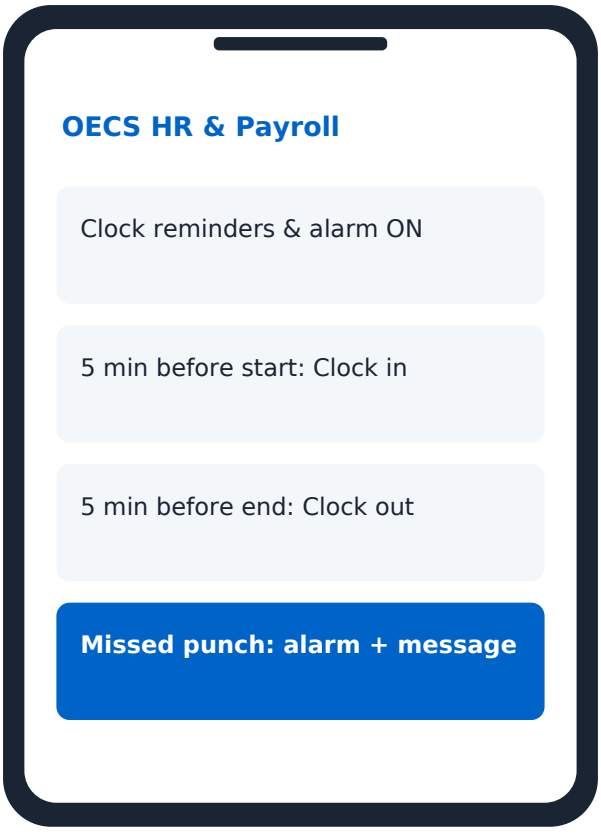

ILLUSTRATION • NOT A LIVE SCREEN

1 Keep the switch on

The switch is on by default. Turn it off or on any time; the choice stays on your own phone.

2 Hear the alarm

Five minutes before your shift starts or ends, the phone beeps, vibrates and shows a message.

3 Act on a missed punch

If a punch is missing, the alarm repeats the reminder. Clock in or out, or ask for a correction.

CHECK BEFORE YOU CONTINUE

The time clock is open on your phone and notifications are allowed.

Alarms ring only while the time clock app is open, including in the background. A fully closed app cannot ring. Your manager's missing-punch alerts still work.

EMPLOYEE

Fix a missing or wrong punch

My account → Fix a punch or query my pay

Request → **Manager checks** → **Decision** → **Hours reviewed**

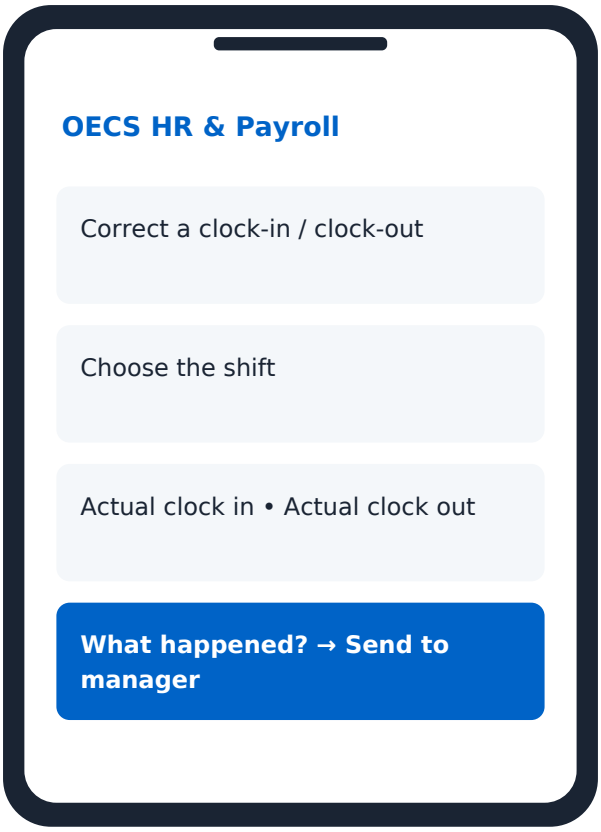

ILLUSTRATION • NOT A LIVE SCREEN

1 Select the shift

Sign in and use My account. Choose Correct a clock-in / clock-out and the affected shift.

2 Explain the correction

Enter both actual times and a clear reason, such as a failed clock-out while leaving the site.

3 Send and follow up

Select Send to manager. Check My requests for the decision and the manager's note.

CHECK BEFORE YOU CONTINUE

A request is visible in My requests; the original punch is not silently overwritten by staff.

The manager must approve a correction. A pending request does not mean the hours are accepted for pay.

EMPLOYEE

Check your pay before pay day

My account → My draft pay · this month

View estimate → **Ask question** → **Manager responds**

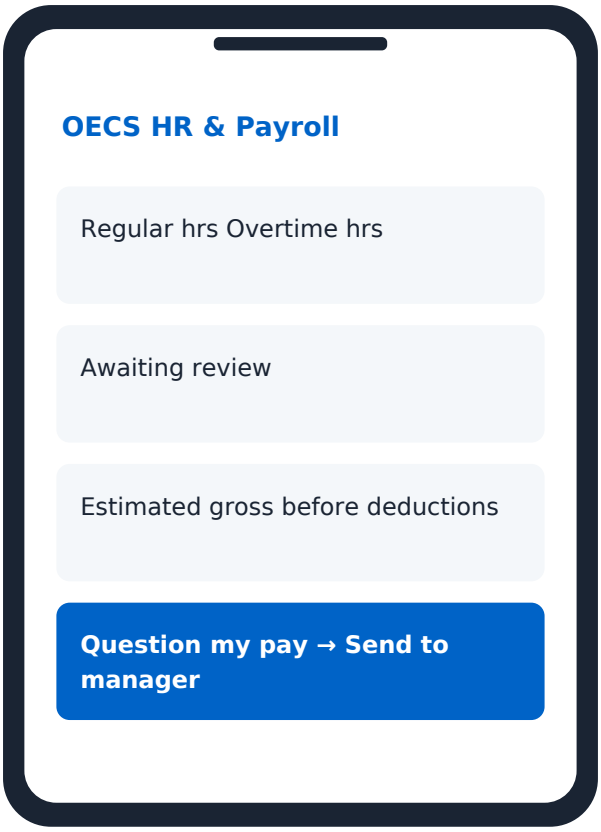

ILLUSTRATION • NOT A LIVE SCREEN

1 Read the estimate

Check regular hours, overtime and shifts awaiting review. Compare them with your own record.

2 Raise the issue early

Choose Question my pay, optionally select a shift, and explain the issue. Submit before payroll approval.

3 Check the reply

Read My requests and the manager's note. Ask again if the explanation does not resolve your question.

CHECK BEFORE YOU CONTINUE

You have discussed the discrepancy before the final payslip is made.

This is current-month estimated gross, not a guaranteed net payment. NIC, PAYE, loans and other deductions change take-home pay.

EMPLOYEE

Read your final payslip

Employee portal → your payslips

Approved run → **Saved payslip** → **Payment checked**

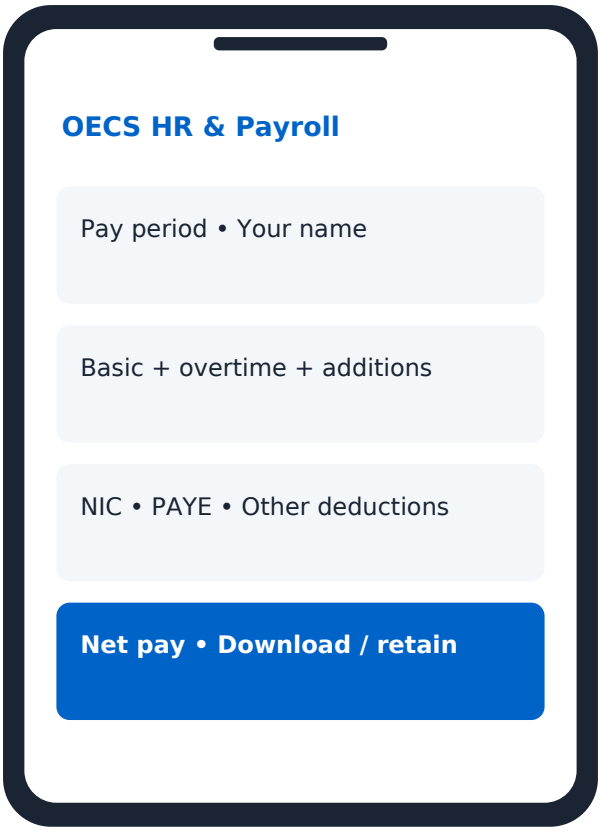

ILLUSTRATION • NOT A LIVE SCREEN

1 Open your own record

After the manager saves payroll, use your employee workspace to find the available saved payslip.

2 Check the amounts

Confirm the period, earnings, deductions and net pay. Save a copy for your records.

3 Confirm payment

Compare the net amount with the payment received. Ask payroll about any difference.

CHECK BEFORE YOU CONTINUE

The payslip agrees with your approved payroll and actual payment.

Approval does not transfer money. If you have clock-only access or no email, ask payroll to arrange your payslip delivery.

ADMINISTRATOR

Set up the company once

Companies → setup link → Activate company

Invite → **Configure** → **Review** → **Activate**

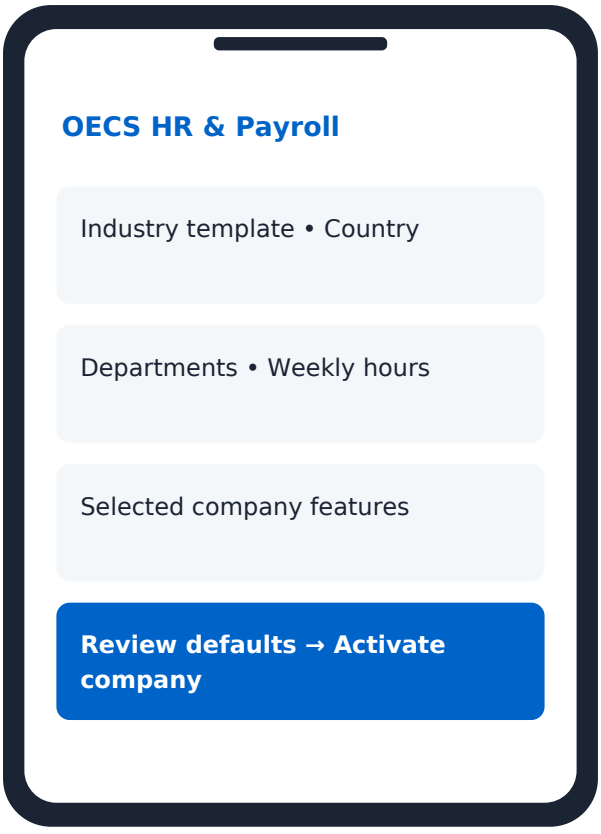

ILLUSTRATION • NOT A LIVE SCREEN

1 Start with the right company

The platform administrator creates the customer setup link. The customer signs in with the invited verified email.

2 Review suggested defaults

Choose General, Construction, Security or Services. Confirm departments, hours and feature selections.

3 Validate local rules

Check taxes, rates, schedules and site rules. Use the Setup Guide before the first live payroll.

CHECK BEFORE YOU CONTINUE

Company details and selected modules match the actual business.

Industry packs reduce typing; they are not automatic legal certification. New-company defaults do not overwrite existing payroll settings.

Three ways to set up a company

Companies / top buttons (hover for a guide)

Choose → Fill / Upload → Compare → Approve

ILLUSTRATED WORKFLOW

1 Start from scratch

Type the details into a short form, or send the customer a one-time setup link.

2 Use our Excel template

Download the blank workbook, fill it in and upload it on Payroll Import. Example placeholders must be replaced.

3 Bring your payroll sheet

Enter the company, industry and country, then upload a past payroll. The AI Paymaster asks questions and compares results.

CHECK BEFORE YOU CONTINUE

Placeholder examples (names, NIC, tax numbers, address) have been replaced with real values.

Changed your mind? Select Abort setup on Payroll Import. The sheet and answers are discarded; nothing was saved.

ADMINISTRATOR

Move from Excel without retyping

Menu → Payroll Import

Workbook → **Questions** → **Compare** → **Approve import**

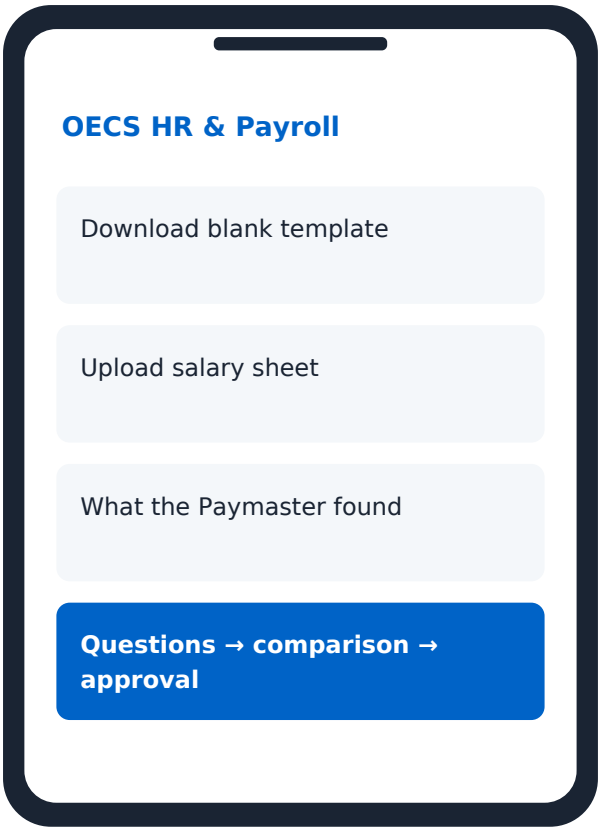

ILLUSTRATION • NOT A LIVE SCREEN

1 Choose your source

Download the onboarding workbook from Training or company setup. Or upload a supported existing salary sheet.

2 Read the findings

Review company, employee, deduction, loan, account and department counts. Select the payroll sheet if prompted.

3 Answer and compare

Explain ambiguous rules and check differences before approving an import. Import does not run payroll.

CHECK BEFORE YOU CONTINUE

You know what will be imported before any records are written.

The spreadsheet interview is guided parsing and rule comparison, not a promise that AI can understand every workbook automatically.

ADMINISTRATOR

Complete the eight-sheet workbook

Payroll Onboarding Template v2

Company → **People** → **Pay inputs** → **Accounting**

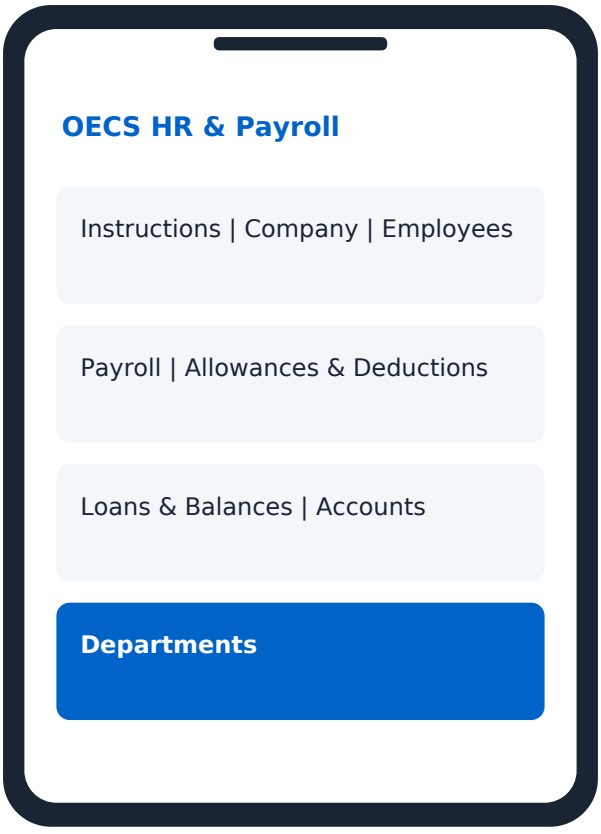

ILLUSTRATION • NOT A LIVE SCREEN

1 Set the foundations

Enter company information, full employee folder details, departments and matching employee names.

2 Enter pay inputs

Fill rates, hours, period figures, allowances, deductions and opening loan balances. Preserve formula headers.

3 Check accounting

Review account codes and names. They are mapping inputs, not automatically verified QuickBooks accounts.

CHECK BEFORE YOU CONTINUE

Delete or replace all example rows before importing into a real company.

The workbook does not upload HR documents, create passwords/PINs or transfer money. Blank optional fields do not remove the need for local validation.

ADMINISTRATOR

Compare before you import

Payroll Import → Approve the import

Source → Recalculation → Difference → Decision

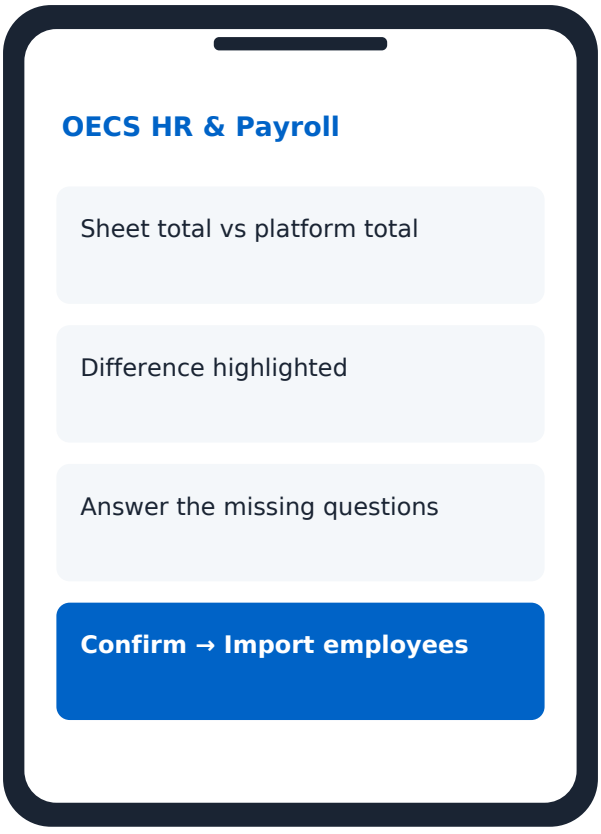

ILLUSTRATION • NOT A LIVE SCREEN

1 Resolve ambiguity

Check daily-rate rules, overtime, NIC basis and PAYE treatment. Do not accept suggested answers blindly.

2 Investigate differences

Compare each employee and totals. Confirm the source sheet may itself contain errors or outdated tax treatment.

3 Approve carefully

An administrator confirms the import. Reopen the folders and settings to verify what was saved.

CHECK BEFORE YOU CONTINUE

The imported company and employee counts reconcile with your approved workbook.

Import writes occur in sequence. A failure can leave earlier items saved. Inspect saved records before retrying; duplicate names are skipped.

ADMINISTRATOR

Finish every employee folder

Employees → folder → Login & clock

Folder → **Account** → **Clock** → **Staff app link**

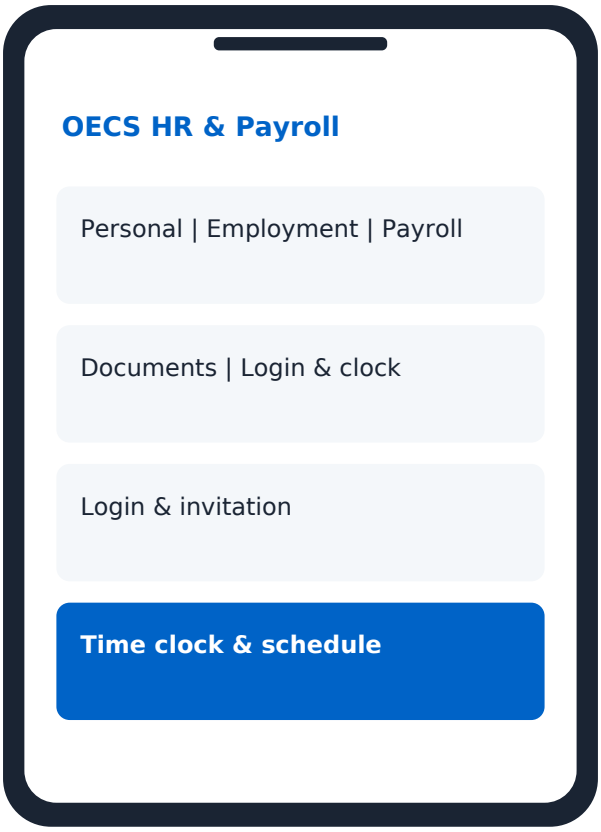

ILLUSTRATION • NOT A LIVE SCREEN

1 Save HR and pay details

Enter department, status, rate basis, working hours, statutory IDs and bank details. Upload HR documents privately.

2 Configure account access

Set Login email or PIN login username/PIN. Send invitation / password reset so staff choose their own password.

3 Configure the clock

Enable Employee clock, set code/PIN, permitted methods, schedule and assigned site. Save and test the correct identity.

CHECK BEFORE YOU CONTINUE

An employee can clock and, with account access, view their own information.

An employment record can exist without an email or login. Set up sign-in separately for pay queries; use unique identities, never shared PINs.

MANAGER

Clear the attendance review queue

Attendance → Staff requests

Evidence → Decision → Approved hours → Payroll review

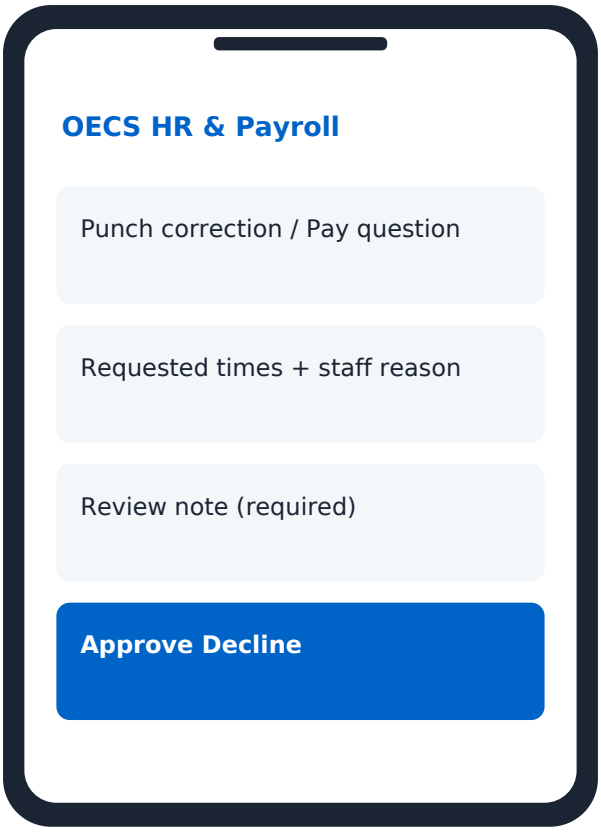

ILLUSTRATION • NOT A LIVE SCREEN

1 Check the evidence

Compare requested times with supervisor records, schedule and original attendance. Review missing-punch suggestions.

2 Record a decision

Write the reason. Approve a valid correction or Decline it with an explanation the employee can read.

3 Refresh payroll inputs

Check the accepted hours and rates. Resolve pay questions in the relevant employee or payroll settings.

CHECK BEFORE YOU CONTINUE

Pending requests and unapproved hours have been investigated before payroll.

Approving a pay question records the decision; it does not automatically edit salary or deductions. Attendance approval is separate from payroll approval.

MANAGER

Use AI Paymaster as your monitor

Menu → AI Paymaster

Monitor → **Investigate** → **Prepare** → **Human review**

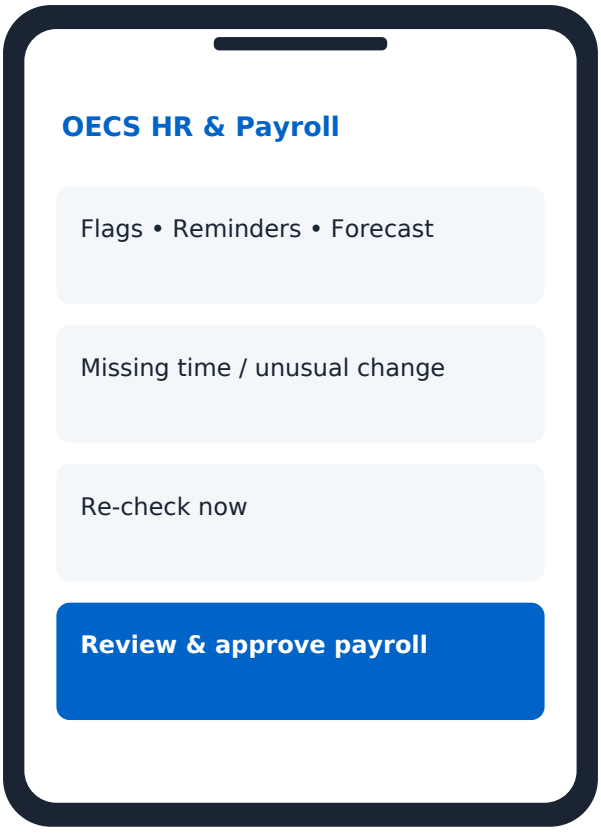

ILLUSTRATION • NOT A LIVE SCREEN

1 Check the monitoring draft

Read the current-month forecast and exceptions. Use Re-check now when you need a fresh check.

2 Follow suggested actions

Open the relevant staff, attendance or payroll page. Verify evidence rather than accepting guessed hours.

3 Move to actual payroll

Select Review & approve payroll. Choose and calculate the real pay period in Run Payroll.

CHECK BEFORE YOU CONTINUE

The manager has reviewed the alerts rather than treating the forecast as a final run.

Paymaster supports scheduled processing, but the deployed schedule is not verified here. It is not continuous monitoring or an autonomous payroll operator.

MANAGER

Choose who and when to pay

Run Payroll → Live employees

People → Period → Rates & hours → Draft

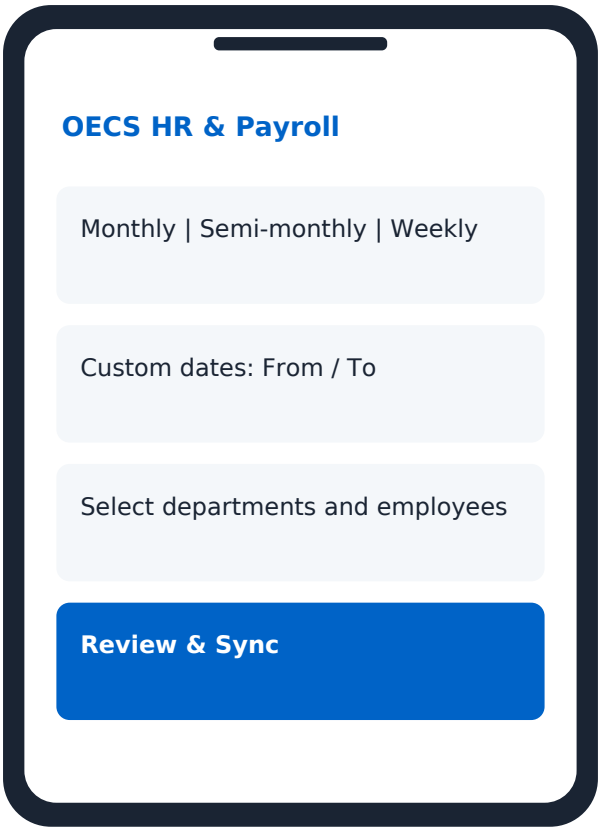

ILLUSTRATION • NOT A LIVE SCREEN

1 Select the live source

Confirm the jurisdiction and employee group. Samples are separate and must never become customer payroll.

2 Set the exact period

Use monthly, half-month, weekly or custom dates. For final pay choose the relevant employee and record a reason.

3 Check the basis

Verify contractual pay or approved attendance-based hourly/daily pay where enabled. Check overtime and additions.

CHECK BEFORE YOU CONTINUE

The correct employees and dates are selected, with no paid-period overlap.

Custom periods count weekdays using the configured proration. Holidays, severance, notice and leave entitlements need professional review.

MANAGER

Audit the calculated payroll

Continue to Audit → Review this payroll

Calculate → AI review → Verify → Recalculate

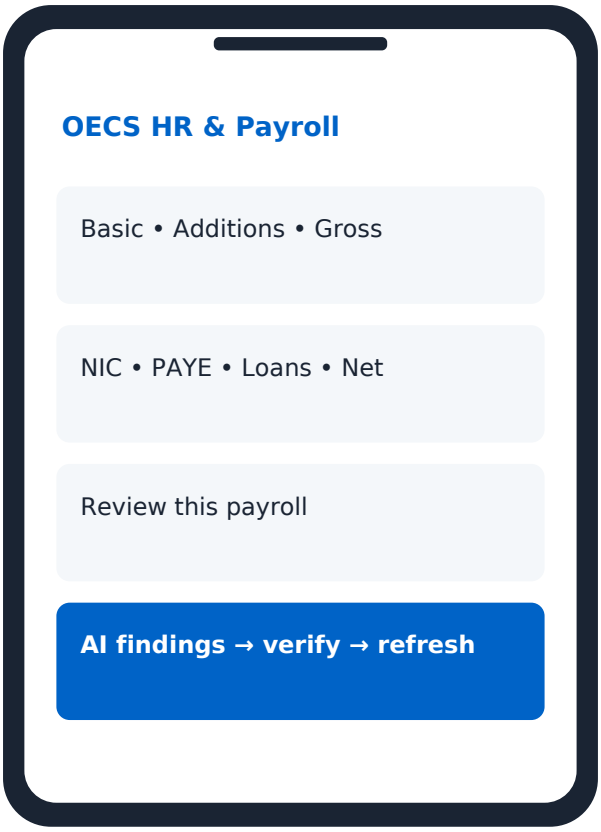

ILLUSTRATION • NOT A LIVE SCREEN

1 Reconcile the rows

Check gross, employee/employer NIC, PAYE, creditors, loan repayment and net pay against the source information.

2 Ask the AI Payroll Officer

Select Review this payroll. Read the anonymous draft review and verify each flagged employee row.

3 Correct and recheck

Change the underlying records, return to payroll and review the refreshed draft. Changed figures invalidate the old AI review.

CHECK BEFORE YOU CONTINUE

Every material exception has an explanation before approval.

The officer is read-only. It does not certify local law, change pay, approve payroll or transfer funds. The worksheet interview and officer review are different tools.

MANAGER / ADMIN

The human approval checkpoint

Continue to Approve → Approve & Save Payroll

Human decision → **Save** → **History** → **Reports**

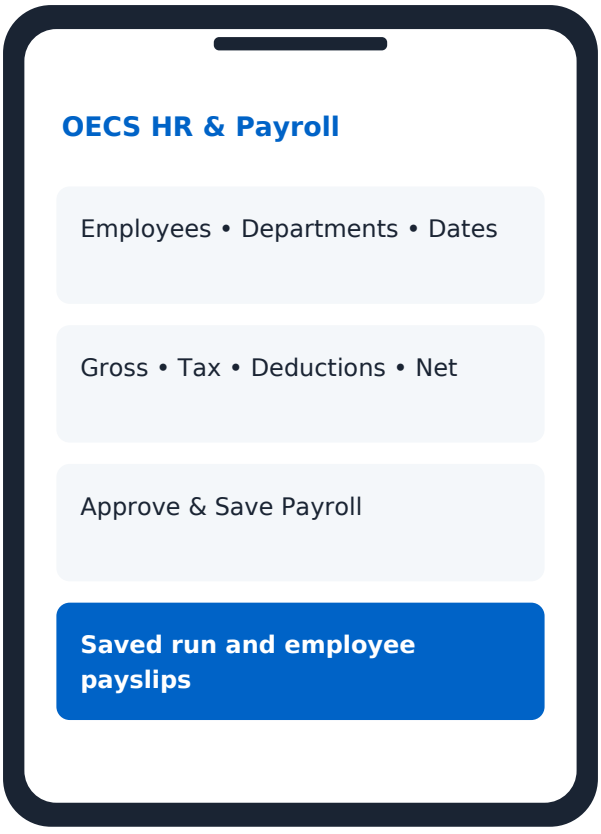

ILLUSTRATION • NOT A LIVE SCREEN

1 Review the summary

Compare totals and resolve staff disputes. Confirm bank details, additions and remaining loan balances.

2 Approve once

Select Approve & Save Payroll. Wait for a successful saved result; an error is not an approval.

3 Read back the saved run

Open View approved payroll reports or Payroll History. Verify dates, employee count and saved payslips.

CHECK BEFORE YOU CONTINUE

A saved payroll record, not an AI recommendation, is the approval result.

The approval process protects against overlapping pay periods and applies supported loan balance updates. It still does not make bank payments.

MANAGER / ADMIN

After approval: what is automatic?

Saved payroll → follow-up checklist

Saved → **Delivery check** → **Accounting check** → **Payment**

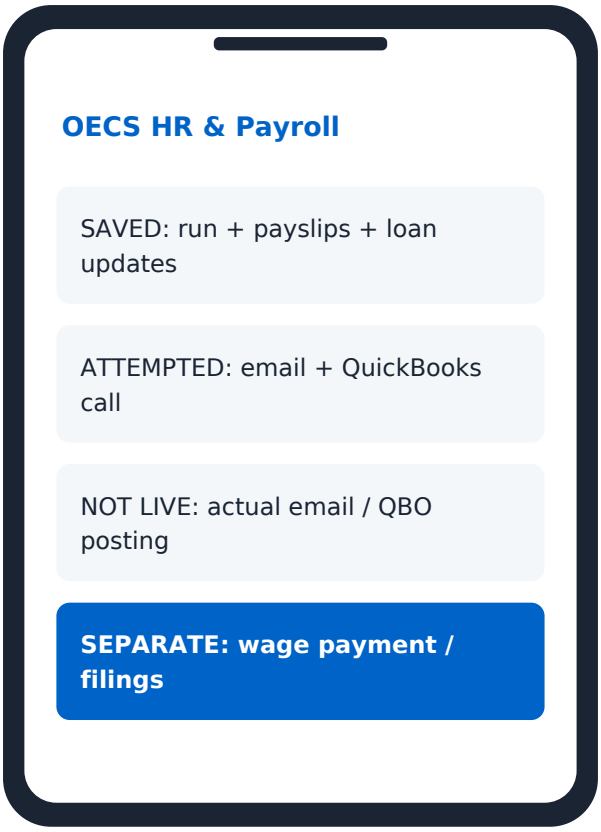

ILLUSTRATION • NOT A LIVE SCREEN

1 Rely on the saved records

The approved payroll and payslips are retained. Read the saved reports to reconcile the run.

2 Check the follow-ups

The page starts email and accounting calls after saving. Current email and QuickBooks handlers do not perform real external delivery.

3 Complete the real handoff

Deliver payslips securely, confirm accounting posting through a working connection, and arrange wage payment separately.

CHECK BEFORE YOU CONTINUE

Actual receipt and posting are confirmed outside a success toast.

Follow-ups are not a durable retry queue and can be interrupted by leaving the page. Do not treat “emailed” or “posted” messages as proof of real delivery.

MANAGER / ADMIN

Report, reconcile and repeat

Reports / Payroll History / QuickBooks

Report → **Reconcile** → **Deliver** → **Next period**

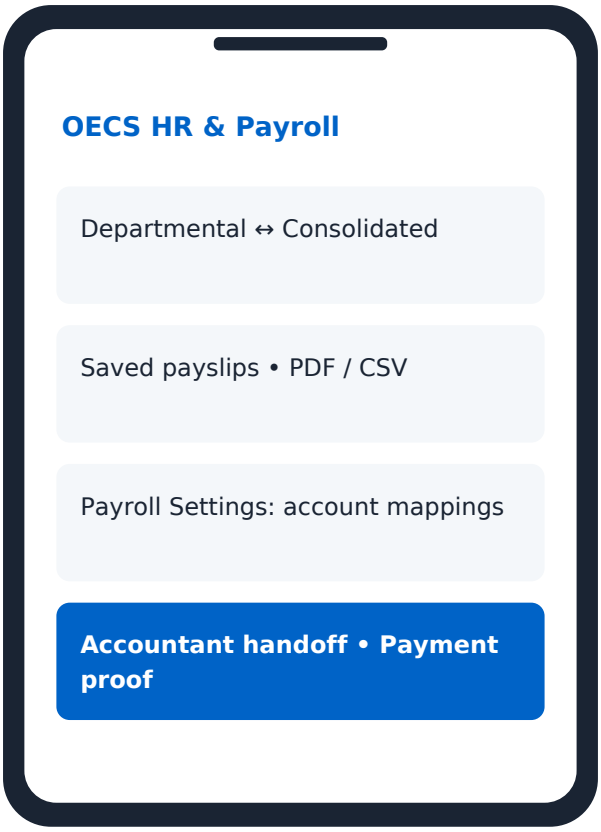

ILLUSTRATION • NOT A LIVE SCREEN

1 Export and reconcile

Select the saved period. Compare departmental totals with consolidated payroll and retain PDF/CSV reports.

2 Prepare the accountant package

Share approved summaries and required records securely. Individual salary slips go only to authorized recipients.

3 Close the period

Confirm actual wage payments, required statutory submissions and any outstanding delivery. Begin the next cycle with clean attendance.

CHECK BEFORE YOU CONTINUE

Saved payroll, payments and accounting records agree.

No automatic external-accountant email or statutory filing is verified. Use the isolated client demo to practice, not as evidence that production delivery works.

MANAGER / ADMIN

Payroll Register & Summary

Reports / Payroll Register & Summary

Filter → Cards → Rows → Reconcile

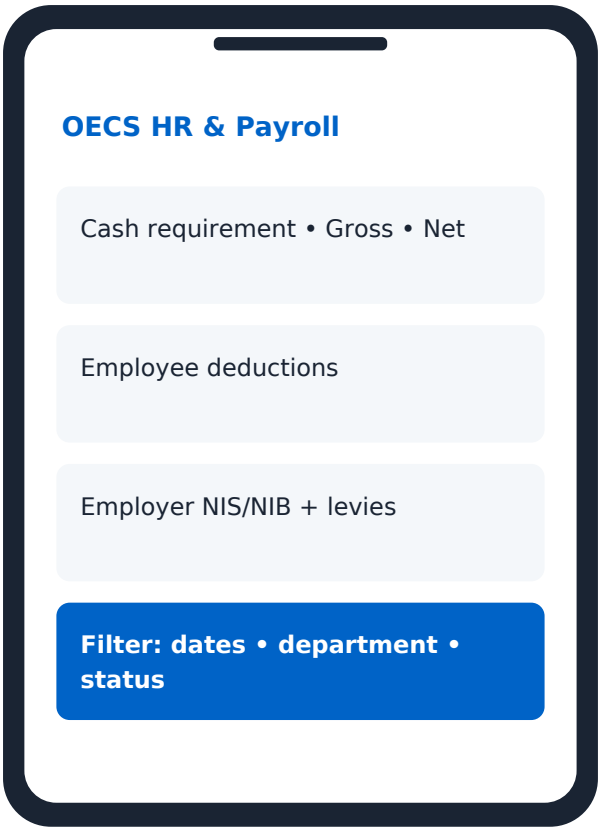

ILLUSTRATION • NOT A LIVE SCREEN

1 Filter the period

Pick From and To dates, a department and employee status.

2 Read the cards

Total cash requirement, gross, employee deductions, employer liabilities and net pay.

3 Check each row

Gross, PAYE, NIS/NIB, local levies, other deductions and net, from approved payslips.

CHECK BEFORE YOU CONTINUE

Totals agree with the approved payroll for the same dates.

Levy rates for some countries are estimates; confirm with your accountant. Export to CSV is coming soon.

MANAGER / ADMIN

Statutory Remittance Report

Reports / Statutory Remittance

Month → **Country** → **Totals** → **Remit**

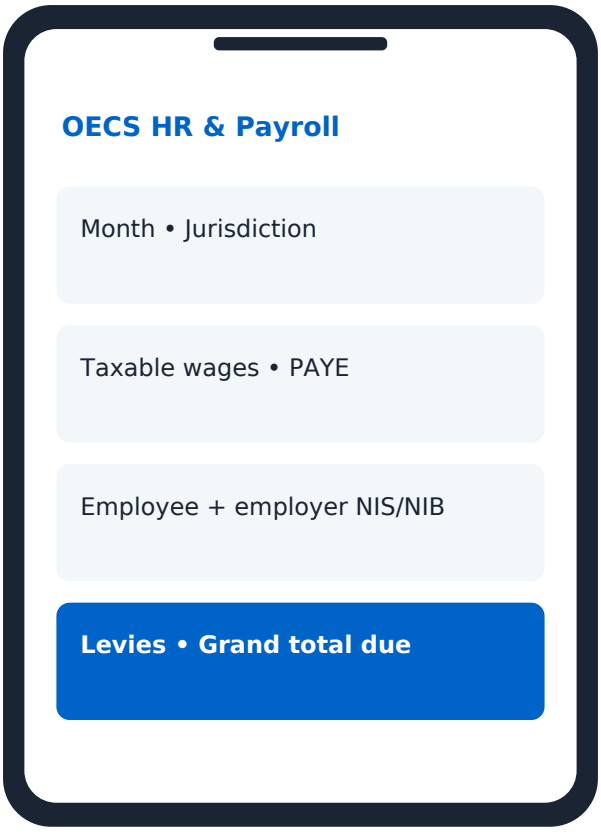

ILLUSTRATION • NOT A LIVE SCREEN

1 Pick month and country

Choose the month and Saint Lucia, Jamaica, Trinidad & Tobago, Barbados or Guyana.

2 Local form wording

Column headers change to that country's tax-form terms.

3 Pay the government total

Rows group by employee; the grand total is the monthly remittance to prepare.

CHECK BEFORE YOU CONTINUE

PAYE and NIS/NIB come from approved payslips; changing country renames headers only.

This report helps prepare remittances; it is not a filed government form.

MANAGER / HR

Time & Attendance Audit

Reports / Time & Attendance Audit

Cycle → Shifts → Flags → Follow up

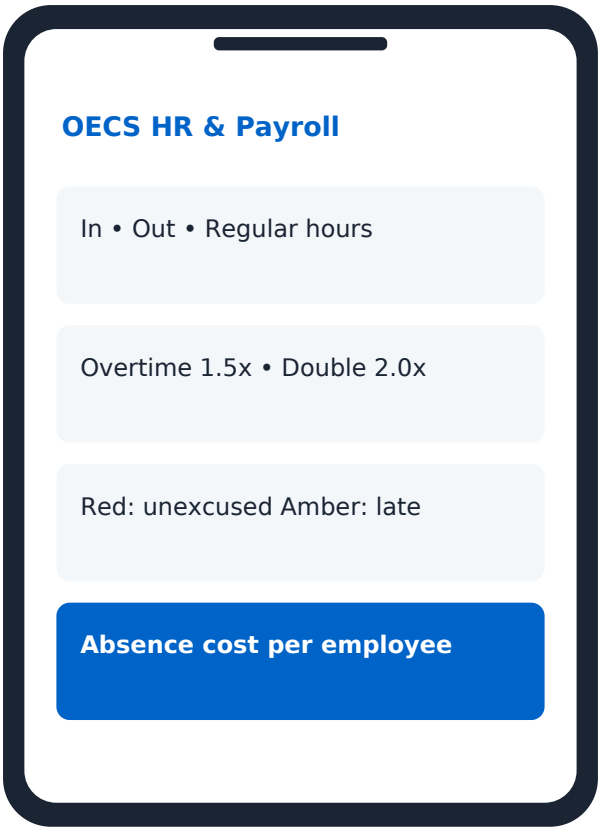

ILLUSTRATION • NOT A LIVE SCREEN

1 Choose the pay cycle

The report starts on this month; change the dates as needed.

2 Scan the shifts

Each shift shows hours split into regular, overtime and double time. Late and missing punches are flagged.

3 Review absences

See days absent, unexcused absences, sick leave, late arrivals and the cost of absence.

CHECK BEFORE YOU CONTINUE

Flagged shifts are corrected or explained before payroll is approved.

Overtime is counted per day. Absence cost assumes 22 working days a month.
